Radiant
Systems

Pre-assembled brass manifold

Datasheet
0106EN 10/2023

The R553D preassembled manifold consists of:

- Supply manifold with front balancing lockshield valves equipped with mechanical memory.
- Return manifold with interception valves with manual handwheel, suitable for thermo-electric command.
- Metal brackets R588Z.
- Set of adhesive labels for identifying the various circuits.
- Spanner R558

➤ Technical data

Performance

- Temperature range: 5÷110 °C
- Max. working pressure: 10 bar
- Outlets center distance: 50 mm

Materials

- Manifold: brass
- Gaskets: EPDM
- Brackets: galvanized steel

Pressure loss of single circuit

N° of lockshield turns	0,25	0,5	0,75	1	1,5	2	2,5	3	4	5	F.O.
Kv	0,06	0,10	0,14	0,17	0,21	0,28	0,37	0,55	0,85	1,20	1,33

Flush-mounting cabinets for manifolds

SERIES	PRODUCT CODE	CABINETS DIMENSIONS (L x H x D) [mm]
R500-1 (flush-mounting)	R500Y111	400 x 460 x 110
	R500Y112	600 x 460 x 110
	R500Y113	800 x 460 x 110
	R500Y114	1000 x 460 x 110
R500-2 (flush-mounting)	R500Y221	400 x 650÷740 x 85÷130
	R500Y222	600 x 650÷740 x 85÷130
	R500Y223	800 x 650÷740 x 85÷130
	R500Y224	1000 x 650÷740 x 85÷130
	R500Y225	1200 x 650÷740 x 85÷130
R500-2E (flush with the wall)	R500Y215	500 x 450 x 80÷110
	R500Y217	700 x 450 x 80÷110
	R500Y218	850 x 450 x 80÷110

✂ ***NOTE.** The cabinet is chosen keeping in consideration the size of the R554D intermediate fitting and R259D ball valve.

► Components

Manifold

The supply manifold consists of a drawn brass bar in a special alloy, containing a balancing lockshield with mechanical memory for each circuit so that the calibration position in each one can be identified and maintained, even in the case of total interception.

The mechanical memory takes the form of a specific ring which, when regulated with the R558 spanner, limits the maximum opening of the lockshield to the value selected during the balancing phase.

To make the correct adjustment, fully open the metal ring using the screwdriver part of the R558 spanner, then close the lockshield valve fully down using the hexagonal part of the spanner.

Open the valve by the number of rotations determined via the calibration diagrams, then tighten the memory ring as far as it will go on the valve.

The return manifold is equipped with interception valves with a manual handwheel, suitable for thermo-electric command via the thermo-electric actuators R478, R478M (normally open) and R473, R473M (normally closed). The actuators are assembled by releasing the handwheel on the manifolds and thereby freeing the valve connection.

R588Z metallic brackets

Metal supports for use in R500-1 or R500-2 flush-mounting metal cabinets and in R500-2E metallic cabinets flush with the wall.

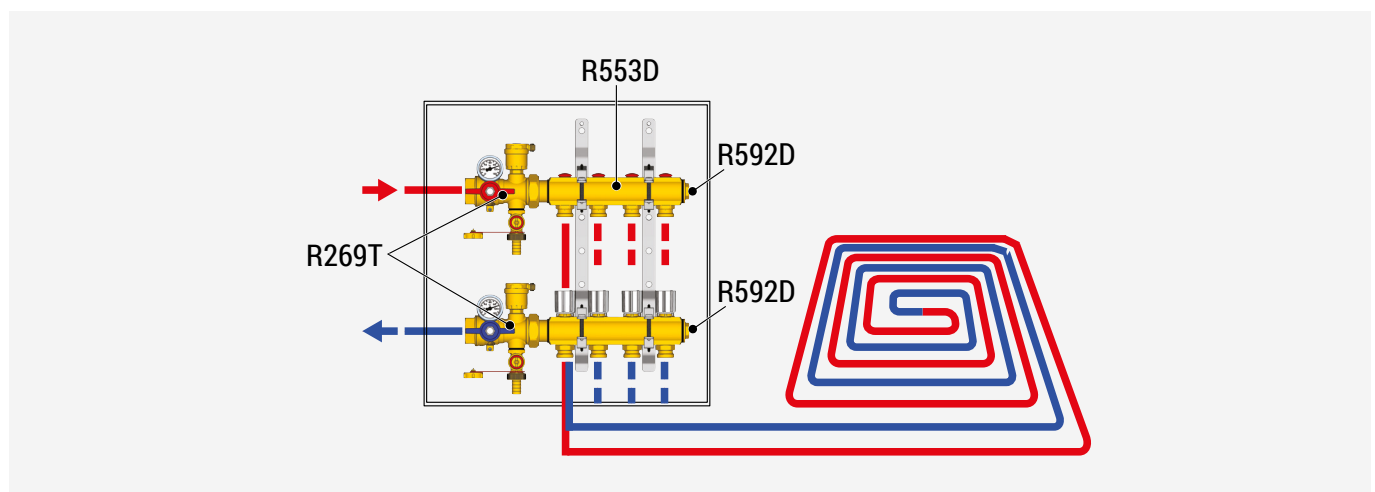

Adjustment key and adhesive labels

The kit is completed with a set of adhesive labels for the detection of the various circuits and an adjusting key for adjusting the holders.

► Installation

- 1) Install any ball valves and intermediate groups at the entrance of the manifold and the terminal groups or taps at the end of the manifold.
- 2) Install the manifold with the metal brackets inside the cabinet.
- 3) Connect the main pipes coming from the boiler room to the manifold connections and the pipes of the system to the manifold outlets.
For the connection use adaptors base 18 (R178, R179 or R179AM series) or Eurocone (R178E, R179E series).
- 4) Install and electrically connecting any electrical actuators in place of the handwheels on the return manifold.

► Product specification

R553D

Preassembled brass manifold for HVAC systems. Center distance between the outflow points 50 mm. Temperature range 5÷110 °C. Max. working pressure 10 bar.

Consisting of: supply manifold with front balancing lockshield equipped with mechanical memory. Return manifold with interception valves with manual handwheel, suitable for thermo-electric command. EPDM gaskets. R588Z metal brackets. Set of adhesive labels for identifying the various circuits. 1 adjustment key R558. Available with connection for base 18 or Eurocone adaptors.

⚠ Safety Warning. Installation, commissioning and periodical maintenance of the product must be carried out by qualified operators in compliance with national regulations and/or local standards. A qualified installer must take all required measures, including use of Individual Protection Devices, for his and others' safety. An improper installation may damage people, animals or objects towards which Giacomini S.p.A. may not be held liable.

♻ Package Disposal. Carton boxes: paper recycling. Plastic bags and bubble wrap: plastic recycling.

ℹ Additional information. For more information, go to giacomini.com or contact our technical assistance service. This document provides only general indications. Giacomini S.p.A. may change at any time, without notice and for technical or commercial reasons, the items included herewith. The information included in this technical sheet do not exempt the user from strictly complying with the rules and good practice standards in force.

♻ Product Disposal. Do not dispose of product as municipal waste at the end of its life cycle. Dispose of product at a special recycling platform managed by local authorities or at retailers providing this type of service.
